- Java
- JavaScript

Languages

- English - Intermediate
- hindi - Fluent

Online Profile

https://guileless-pony-f483a3.netlify.app/

Awards / Achievements

participated in csi
December 2022

I have participated in csi fest in out college

Projects / Papers Presented

---

web testing website application

https://github.com/Alexanderwar/web_testing

April 2023

This project is used to test lambdatest website.This project uses selenium to extract network logs from the lambdatest website and uses elasticsearch to store the data.And fastapi server to extract the data and react js application is used to create insights from the data

database using duckdb

https://github.com/Alexanderwar/database_duckdb

April 2026

This project is used to query data from csv files using duckdb which is a very fast tool to query databases.You can upload your csv files to the application and then you can edit the json file and send request to the fastapi application running in the background to get information json files.This project has three folder you can set this project on localhost or you can dockerize this project and use this you can also deploy the project on firebase and i have already done this.

data visualization

https://github.com/Alexanderwar/mongodb_project

April 2023

This project is used to visualize json data using d3.i am using topojson to create the map and d3 library html,css,javascript for creating the frontend and for backend i am using python flask framework and for the database i am using mongodb.
